Vignan's Institute of Information Technology

B.Tech in Computer Science and Engineering

Duvvada, Andhra Pradesh

Aug 2020 - May 2024

Narayana Jr College

Board of Intermediate Education, MPC

Visakhapatnam, Andhra Pradesh

Jun 2018 - Jan 2020

TECHNICAL SKILLS

Programming Languages: Python, C, Java

Databases: SQL, MongoDB

Design Tools: Figma, Adobe XD, Photoshop.

Design Skills: Wireframing, Prototyping, Color Theory

Web Technologies: HTML, CSS, JavaScript

Frameworks/Libraries: Angular, ReactJS, Spring Boot, Bootstrap

Languages Known: English(C2), Telugu(C1), Hindi(A1)

WORK EXPERIENCE

Frontend Developer

Tata Consultancy Services (Client Project: ICICI iLens)

July 2025 - Present

- Developing and maintaining frontend modules for the ICICI iLens application using Angular, TypeScript.
- Implementing client-requested enhancements, UI modifications, and business requirement changes across multiple loan processing modules.
- Fixing frontend bugs, integrating APIs, and improving application performance and usability.
- Collaborating with backend, QA, and team members in an Agile development environment.

UI Designer

Self Employed - Freelance, Remote

Sept 2023 - Jan 2024

- Collaborated with clients to understand their vision and requirements, aligning designs with business goals.
- Applied principles of color theory, typography, and layout design to create engaging and functional digital experiences.
- Conducted user research and usability testing, iterating on design solutions to improve user satisfaction.
- Developed wireframes, prototypes, and high-fidelity mockups using Figma and Adobe XD.
- Implemented responsive design techniques to ensure seamless experiences across various devices.
- Managed multiple projects, delivering high-quality designs within tight deadlines.

PROJECTS

- **RR Career AI**, Developed an AI-powered career guidance platform with AI risk analysis, skill gap detection, career comparison, and personalized learning roadmaps. [Link](#)
- **Employee Resource Management System — Case Study**, Developed a SpringBoot–Angular web application for employee management, project allocation, attendance, and reporting with authentication and audit logging.
- **Trip-Thrive-AI**, Collaborated within a team to develop an AI-based trip planner, facilitating efficient trip planning for users based on destination, budget, and duration. Enhanced travel experiences through personalized itinerary recommendations. [Link](#)
- **BOOK TREKKER**, Collaborated with a team of four to design an online bookstore and added many features for users. Designed the website with a user-friendly interface, easy navigation, and attractive layout.
- **CAREER FRIEND**, Led a collaborative effort with a team of three to design and launch a user-friendly website catering to freshers and job seekers, revolutionizing the job search experience. [Link](#)
